

Impact of IDMP and the recommendations for 'standards' (HL7)

Giorgio Cangilioli - HL7 Int. Foundation

Final Expert Council Meeting
London 2016 November 10th

The choice...

ISO Identification of Medicinal Products
(IDMP) Standards

What about the other standards ?

- **ISO 11616:2012; ISO 11615:2012(E)**
 - This International Standard has been developed in conjunction with the Common Product Model in HL7. It is anticipated that **implementation will use HL7 V3 messaging** to transmit information between stakeholders
- **ISO 11616:2012 § 4.2 Exchange of pharmaceutical product information**
 - “The **HL7 Version 3 messaging standard shall be utilized** for the exchange of medicinal product information emphasizing the importance of having a standardized method of exchanging medicinal product information **in support of regulatory and pharmacovigilance activities**”

What about the other standards ?

- **ISO 11616:2012; ISO 11615:2012(E)**

- This International Standard has been developed in conjunction with the Common Product Model in HL7. It is anticipated to be used for HL7 messaging to transmit information between stakeholders

For regulatory purposes !

- **ISO 11616:2012 § 4.2 Exchange of pharmaceutical product information**

- “The HL7 **OK for SPL and ICSR** can be utilized for the exchange of pharmaceutical product information, emphasizing the importance of having a standardized method of exchanging medicinal product information in support of regulatory and pharmacovigilance activities”
